Tools: Visual Studio Code

Institutional Review Board (IRB) is a web app used for medical research proposal management, which was developed in HTML, CSS JAVASCRIPT, and the backend language was PHP using the database MYSQL, my role in this project was as a junior developer I made the login, signup system and admin authentication system using email, and also I made proposal management system in which user can upload the proposal in the document file and the board will review that proposal

Down the Memory Lane

University Project | Apr 2018 - Jul 2018

Tools: Android Studio

Down the Memory Lane is a Android Application , The main purpose of this App is to recall the memory of someone's life events through Photos

- "Down the Memory Lane" project through photos is an initiative that seeks to preserve and showcase the rich history and culture of a community through old photos. The project involves collecting and digitizing old photos and organizing them into a searchable online database, accessible to the public.
- The project aims to capture and preserve the collective memories of the community, including its people, places, and events. The photos are sourced from individuals, families, local organizations, and historical archives, and cover a range of time periods, from the early days of the community to the present.
- The photos are categorized and tagged by subject, location, date, and other relevant information, making it easy for users to search and find specific photos. The database is regularly updated with new photos and information, and users are encouraged to contribute their own photos and stories to enrich the collection.
